Do you ever worry about your memory? Perhaps you go into a room and forget what you came for, or may be something on the tip of your tongue, but you can't get it off. Don't worry. You are perfectly normal. It is the nature of the mind to forget – and the nature of man to worry about forgetfulness.

Human beings have a prodigious memory. In a few cubic centimeters the brain stores more information that can be stored in a large computer. Today neurologists, psychologists and biologists are studying the different aspects of memory.
