(5)

The press and public were all fire and fury, especially in America. A bill was passed by the senate according to which the manufacturer of nitro-glycerin would, in the event of an accident, be charged with murder and liable to be sentenced to death by hanging. Britain introduced safety regulation which amounted to a virtual ban on the import and manufacture of nitro-glycerin. France and Belgium made the possession of the dangerous oil. Alfred Nobel saw himself face to face the ruin. There was only one way out of the dilemma ; that of trying to solidify the oil so that it could be transported with absolute safety.

(i)   Nitro-glycerin was manufactured by

        (1)   The Scientists

        (2)   The Nobles

        (3)   The Doctors

        (4)   Larsen.

    (ii)   A virtual ban was put by

        (1)   Britain

        (2)   Belgium

        (3)   France

        (4)   America

    (iii) Nitro-glycerin is

        (1)   Medicine

        (2)   Dangerous weapon

        (3)   A dangerous oil

        (4)   Gun-powder

    (iv) The man who tried to solidify oil was

        (1)   Larsen

        (2)   Pringle

        (3)   Nobel

        (4)   Alfred Nobel

    (v)   The press and public were all fire and fury in

        (1)   France

        (2)   America

        (3)   Belgium

        (4)   Pringle

(b)   Describe the friendship of Subha and Pratap.

(c)   Attempt an evaluation of the grain merchant's character in 'Diamond Rice'.

SECTION – D

7.   Read the following passage and summarize it :   (5)

There are times when the night sky glows with bands of colour. The bands may begin as cloud shapes and then spread into a great arc across the entire sky. They may fall in folds like a curtain drawn across the heaven. The lights usually grow brighter and then suddenly dim. During this time the sky glows with pale yellow, pink, violet, blue and red. These lights are called the Aurora Borealis or the Northern lights.

The solar particles from the sun enter the Earth's magnetic field and collide with gas particles in the Earth's atmosphere. These collisions create the Northern Lights.

The kinds of particles bumping into each other determine the colours of the Northern lights. If the solar particles collide with oxygen, the lights produced might be green or yellow. When the solar particles run into nitrogen, the lights tends to be red or blue. How fact the particles are moving determine the size and shape of the lights.

In ancient times people were afraid of the lights. They imagined that they saw fiery dragons in the sky. Some even concluded that the heavens were on fire.

8. Write an essay on ONE of the following :   (5)

(a) Advancement of science and Human life

(b) Communal harmony

(c) Globalisation.
